**1<sup>th</sup> International Conference on Applied Information and Communication Technology (ICO-ApICT)**

**October 2-3, 2013  
UNIKOM, Bandung, Indonesia**

## INTRODUCTION

The rapid development of ICT has enabled the technology to underpin many aspects of life. Various scientific fields tend to use and apply ICT to make the operation more effective and easier. Today, the use of ICT is ranging from engineering, economics, politics, law, literature to art, utilizing it in various forms and requirements.

With ICT, those fields can optimize their work and even get new opportunities in the developing the endeavor to reach beyond current possibilities. This is possible due to the effective and efficient manner of the ICT. With this technology, distance, time, will be no longer a boundary to support further areas of optimized scientific resources.

This seminar is intended to summarize the research idea as well as to promote other forms of real implementation of the use and role of ICT in the field of engineering, economics, politics, law, literature and art.
